Ports Overview

With a coastline exceeding 450 km, the **Netherlands** is adjacent to Belgium, Germany and the United Kingdom in the North Sea. Being a nation of advanced development, it maintains a robust shipping industry and stands out as one of the most bustling regions globally for shipping activities.

- As the largest seaport in Europe, the Port of Rotterdam managed 13.4 million TEU in 2023, representing a significant portion of the total cargo throughput in the Netherlands.
- The Port of Amsterdam is equipped with 35 specialized berths to process a wide range of cargo, from breakbulk and liquid cargo to general cargo and forest products.
- The Port of Moerdijk is able to handle more than 13.5 million tonnes of cargo, around 13,500 vessels, and 500,000 TEU on a yearly basis.
- The majority of outer harbors within the Port of Vlaardingen are privately owned and have the capacity to host general cargo vessels, bulk carriers and tankers.
- Zeeland Seaports places a strong focus on inland shipping, enabling access to multimodal transport opportunities reaching into the European hinterland, where approximately 2.5 million TEU of containers are transported per year.

Product Solutions

CFS Network

Our strong local CFS network brings control and efficiencies to inland freight movements for shippers. CFS spots help maintain records of shipments, bonded warehouses services and custom brokerages. We also offers Ocean / Air Freight, Haulage, Project Management, Port Agency and Removal / Relocation.

Origin Storage

Bonded warehouses offer services that enable businesses to customize their products based on market demands or prepare them for distribution to specific locations, thus adding value to the stored inventory. Non-bonded warehouses cater to domestic distribution, serving as temporary storage points before goods are sold or further distributed within the country.

Value Added Services

Labeling, Scanning and Weighing, Carton Inspection, Rework/Pick & Pack, Transloading, and Cross Docking are available.

Services can be tailored in accordance with the requirements of each specific customer, especially on stuffing method, load plan and inventory report.

Inland Transportation

Century has partnered with major trucking hauliers in order to provide excellent trucking services for both local and cross-border shipments. All trucking services are provided with high quality and trusted GPS network as the cargo movement are monitored conveniently by the customers.

Thank you!
